VICTOR BOSCH

GAME DEVELOPER - UI/UX & GAMEPLAY SYSTEMS

Barcelona, Spain · +34 608560025 · vbr084299@gmail.com
Portfolio: victorbr2.github.io/Portfolio · LinkedIn: victorboschcdeth · itch.io: caeldeth1.itch.io

PROFILE

Game developer with 4 years of hands-on Unity experience, focused on gameplay systems and UI/UX. Designs progression, economies and interfaces, and builds them in Unity and C#, from first prototype to published build. Experienced in solo development and in a multidisciplinary team, with a focus on clear, functional systems that support the player experience.

CORE SKILLS

Gameplay Systems
Progression systems - Game economy - Gameplay mechanics - Game AI - Balancing - Playtesting

UI/UX & Interaction
UI design - UX design - Gameplay flows - Player feedback - UI implementation - UI animation

Tools & Technical
Unity - C# - ScriptableObjects - Figma - Prototyping - Debugging - Git

Production
Iterative design - Production planning - Team collaboration - Documentation

EDUCATION

Diploma in Video Game Design
LCI Barcelona - School of Design and Visual Arts
2021-2025

Video Game Design and Development
Centre de la Imatge i la Tecnologia Multimèdia (CITM - UPC), Terrassa
2018-2020

LANGUAGES

Spanish - Native
Catalan - Native
English - Advanced

AVAILABILITY

Based in Barcelona. Open to remote roles, or hybrid and on-site roles in Barcelona. Immediate start possible.

SELECTED PROJECTS

EGYPT COMMANDER

Solo Developer · Unity · Released on itch.io

Isometric real-time strategy game where ancient Egyptians defend their pyramid from an alien invasion.

- Designed and developed the game solo, from concept to release on itch.io with a gameplay trailer.
- Built troop management, unit AI and resource management systems with configurable gameplay data.
- Defined the UI direction (flat 2D vector, mobile-game quality) and designed the interface, using AI tools to generate the visual assets.
- Implemented four game modes: Story, Hard, Very Hard and Roguelike.

POTION GRABBER

Solo Developer · Unity 6 · Released

Incremental game developed independently in 3 months, from concept to release.

- Designed a progression system with 4 upgrade branches and 44 upgrade nodes, connected to the game's economy and gameplay systems.
- Implemented 7 UI panels and data-driven upgrade effects with ScriptableObjects.
- Published on itch.io with PC and Android builds and a browser-playable version.

BUGZONIA

UI/UX, Technical Art & Production · Unity · 5-person student team, LCI Barcelona

Turn-based 1v1 strategy game set in the Amazon rainforest.

- Designed and implemented 10+ UI screens and interface elements.
- Worked on faction-specific abilities (3 per faction) and their visual feedback.
- Coordinated production tasks, playtesting and promotional materials for 2 demos or showcase events.
- Worked on mobile optimization and Android, PC and browser builds.

BATTLE PASS MOCKUP

Solo · Figma & Unity · UI Design & Implementation

- Designed in Figma and built in Unity a Battle Pass UI with 20 reward cards and 11 progression checkpoints.
- Reusable UI components, ScriptableObject-driven rewards and unlock animations.

EXPERIENCE

INDEPENDENT GAME DEVELOPER

2021-Present

- Developed 6 Unity projects across independent game development and prototyping.
- Implemented UI systems, gameplay mechanics and interactive features using Unity and C#.
- Worked across UX design, gameplay balancing, debugging and feature prioritization.
